Strengthen your leadership skills through self-awareness and the tools to effectively lead and create a team that is positive, motivated and productive. Many supervisors/managers have never received formal training and are relying on the leaders they've had in the past as role models (whether good or bad). This can lead to feeling under-equipped for the complex challenges involved in today's leadership roles.

Leading with Confidence focuses on providing new or experienced supervisors/managers with the knowledge, awareness and skills necessary to reduce conflict, improve confidence, enhance communication, and increase employee engagement and satisfaction.

Specifically, participants will learn:

- The Role of the Supervisor & how to facilitate effective leadership
- How to conduct a team assessment and get the pulse on your team
- Strategies to identify and deal with low performing employees
- Coaching, motivation & commitment skills
- How to conduct effective meetings
- Effective communication skills (giving/receiving feedback, listening, having difficult conversations, dealing with conflict)
- To tap into their leadership potential with integrity and authenticity

Who Should Attend:

Leading with Confidence is designed for supervisors and managers who are looking for new leadership skills and strategies, and/or to refresh and validate their current leadership abilities.

Participants will receive a **Supervisory Skills** certificate of completion for 12 hours of supervision training.
